## 3.5" HDD Media Player + Mega miniSAN

**MediaLAN  
ME-747AK-SI**

ME-747AK-SI, an USB2.0/Ethernet combo HDD Storage, integrating Multimedia & Network as a home entertainment center. It not only can play movies, music & photos directly on TV, also enables users share, store and play multimedia files via connecting it to wired or wireless router.

The Mega miniSAN adopts an open SAN protocol named ATA-over-Ethernet (AoE). That is , beyond common TCP/IP management facilities , Mega miniSAN uses AoE as a thin layer to process ATA commands directly over Ethernet traffic. This design has proven its ability to offer 3x-5x performance over fastest home NAS SoC implementations

### Specification:
